Lancaster Farming

Vol. 17 No. 49 | Lancaster Farming, Saturday, October 28, 1972 | $2.00 Per Year

Next year's board of directors for the Lancaster County Farmers Association are shown here after the group's annual meeting last Friday night at the Harvest Drive Motel. Seated, left to right, are: Jessie Balmer, Nathan Stoltzfus, James Hess, Earl Newcomer, Roger Thome and Ellis Mentzer. Standing: James Garber, John Myer, Robert Kauffman, Donald Hershey, James Shertzer, Ivan Yost and William Guhl. Not present for the photo was Mrs. Jesse Wood.

Lancaster County Farmers Assoc. Votes on Policies

The Lancaster County Farmers' Association held their 20th annual meeting and banquet last Friday night at the Harvest Drive Motel near Intercourse. Hundreds of members were on hand to vote on new directors and policy matters, and to hear Penrose Halowell, Pennsylvania director of the Farmers' Home Administration.

County agent Max Smith spoke briefly to the group. A business session and committee reports were also included in the meeting. The speaker for the evening was introduced by Chester Heim, the legislative director for the Pennsylvania Farmers Association.

In his speech, Hallowell spoke about the work being done by the FHA to help long-time farmers as well as those who are just getting into farming. He also discussed the prospects for the passage of legislation which would require farmland to be taxed according to use rather than market value.

During the meeting, the members voted on some two dozen policy recommendations which had been drafted by small committee meetings earlier in the year. All the committee recommendations were approved by the members.

The policy recommendations included items on labor, such as a prohibition on farm worker strikes during harvest, and an exemption from minimum wage laws for handicapped persons. There were several recommendations pertaining to milk prices and marketing. Taxes were mentioned several times, and there were a few mentions of schools.

Members voted to recommend the abolition of teacher tenure, and the adoption of a state-wide school building code.

Directors elected for a two-year term were: Earl New comer, Washington Boro R1; Jessie Balmer, Lititz R4; Ellis Mentzer, New Holland R2; James A. Hess, Quarryville R2; Nathan Stoltzfus, Gap R2; and Roger Thome, Elizabethtown R3.

Hold-over directors elected last year are: William Guhl, Oxford R2; Ivan Yost, Christiana R1; Donald Hershey, Manheim R2; Robert Kauffman, Elizabethtown R1; John Garber, Mt. Joy R2; James Shertzer, Millport Rd., Lancaster; and Mrs. Jesse Wood, Nottingham R2.

New officers for the association will be elected at a directors meeting scheduled for the near future.

Urner Explains ECI Incidents

Price reporting for the egg industry has been a hotly debated item in the past few years. Earlier this year, Egg Clearinghouse, Inc., Durham, N.H., seemed to be on the verge of leading the industry to a new price discovery system. ECI proposed a three-man pricing committee which would confer twice a week to set the market.

One member of the committee was to represent producers, one was to represent marketers, and the third was to be a disinterested party. This third was perhaps the key to the committee's success. Frank Urner was the one man who, most of the industry felt, should be that third member.

In August, Urner had tentatively said he would serve on the committee. In September he backed out. Urner explained the reasons for his actions at a recent meeting of the Pennsylvania Egg

Turn Clocks Back Sunday

Daylight saving time will come to an official end on Sunday at 2 a.m., at which time we will turn the clock back one hour. Standard time will continue until April 29, 1973.

Fulton Grange Votes to Oppose Co. Home Rule

County administrator Ben Weaver was the featured speaker at a lively meeting of the Fulton Grange on Monday night. Weaver discussed the pros and cons of the home rule issue as it might affect rural areas of Lancaster County The county will vote on November 7 to determine whether or not a study commission will be established to examine a home rule charter for the county.

"We're not going to be voting to change the county government," Weaver said, "we're just going to vote on whether or not we want a study commission."

At a business session following Weaver's speech, the Grange members voted to go on record as opposing home rule for Lancaster County.

Weaver urged everyone to vote for the commission, and said that he was an advocate of home rule. He pointed out that the study commission could decide home rule was not a good idea for the county, and the matter would then be dropped. Another possibility, he said, is that the commission will draft a home rule charter. This charter would then have to be placed on the ballot in a regular election. At that time, the voters could turn down home rule no matter what the commission recommended.

As the meeting went on, it became increasingly clear that most of the Grange members there were against home rule. Grange member and former state representative Norman Wood said that home rule throughout the state would result in chaotic county government Direction from Harrisburg, he maintained was a more efficient and fair way of determining the forms of county governments.

Charles McSparran, another Grange member, said he felt that a vote for the study commission

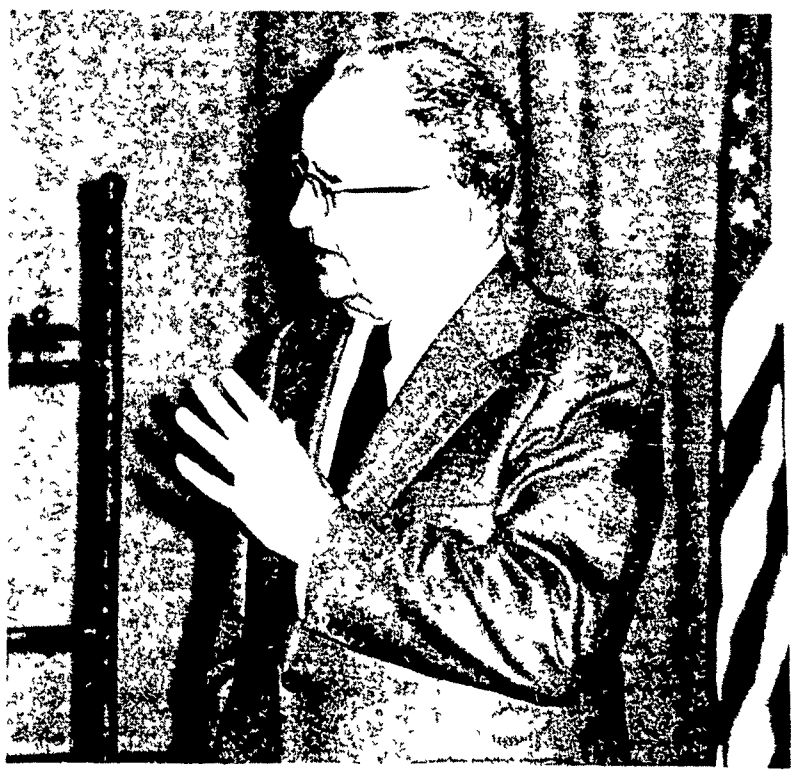
Names Sought For Outstanding Young Farmer

The Quarryville Jaycees are accepting nominations for Outstanding Young Farmer. Men under the age of 35 may be nominated by businesses, associates, or an entrant himself. There is no cost in making a nomination or entering the competition.

The 1971 Outstanding Young Farmer, P. Robert Wenger of Quarryville R1, was entered in state competition last year and placed fourth. The state winner receives the use of a 1973 Chevrolet pickup for one year and is entered in national competition.

Last year a number of local feed and farm equipment dealers made nominations for the Outstanding Young Farmer.

Entries will be accepted from the Solanco and Lampeter-Strasburg school districts. Parties interested in making nominations should call 786-7786 or 786-2879 after 5:00 P.M. by November 4th.



County administrator Ben Weaver faced a polite but skeptical crowd at an open meeting on home rule conducted by the Fulton Grange on Monday night. In a business session following Weaver's speech, members voted to oppose home rule for Lancaster County.

Same period last year	615,000	1,699,000	219,000

Omaha Cattle

Thursday, October 26

Compared to previous week's close closing prices 1000-1125 pound slaughter steers weak to 25c lower, 1125-1300 pounds 25-50c lower. Heifers weak to 25c lower. Cows were 1.00-1.50 lower. Bulls steady. Modest feeder supply steady with outgo of fleshy 950-1075 pound two-way steers noticeably reduced from most recent weeks.

Four day receipts 15,700 as compared 18,200 previous week and 16,900 a year ago. Slaughter steers approximately 30 percent and heifers 39 percent with liberal percentage Choice and moderate volume High-Choice and Prime. Cows 9 percent and feeders near 20 percent. Prices on slaughter steers forced downward as a consequence of lowered carcass quotations. Best demand centered on 1000-1125 pound weights in reflection of 1.00-1.50 differential between 500-700 pound carcasses and those in the 800-900 pound bracket and as much as 4.00-5.00 on some yield grade 4 and 5. Most interests entered the week with fairly liberal inventories on hand and the slaughter period was disrupted by a non-slaughter Veteran's Holiday in many plants on Monday.

STEERS: Forepart of week, twelve loads High-Choice and Prime 1049-1173 pounds 2-4 35.40-35.85. At midweek, six loads same grade 1082-1186 3-4 35.25-35.35, two loads 1356-1381 4 34.75-35.00. Choice 975-1262 2-4 closed 34.00-35.00, those at latter price mainly 1000-1125 pounds. Mixed Good and Choice 950-1225 33.50-34.00 occasionally 34.25. Good 32.50-33.75, Holsteins 32.50-33.50 during week. Standard and Low-Good 31.50-32.50.

Average cost slaughter steers first three days 34.77 average weight 1142 pounds as compared 34.52 and 1138 pounds previous week and 32.42 and 1101 pounds a year ago.

HEIFERS: Early, twelve loads High-Choice and Prime 925-1076 pounds 3-4, 34.35-34.50. At midweek, five loads High-Choice and Prime 935-1094 3-4 34.10-34.25. Choice 825-1050 closed 33.25-34.00, load 1158 pounds 4-5 32.50. Mixed Good and Choice 750-975 32.25-33.25. Good 30.50-32.25. Small lots Standard and Good 29.50-30.50.

Peoria Cattle

Thursday, October 26

Receipts this week 4800; last week 3564, last year 3839.

Moderate price increases sustained early in the week were more than off set by sharp declines on Wednesday. As compared to last weeks close, High Choice and Prime steers ended fully 50, instances 75 lower. Choice and below grades were 25 to mostly 50 lower. Mixed Choice and Prime heifers closed 25-50 lower with below grades about steady. Cows were 1.50-2.00 lower. Bulls steady to 50 lower. Supply mainly Choice slaughter steers and heifers with several loads Choice to Prime 1150-1300 pound steers Receipts about 75 per cent steers; 20 per cent heifers; 5 per cent cows and bulls.

SLAUGHTER STEERS: High Choice and Prime 1175-1300 pounds 3-4, 36.00-36.50 Wednesday, up to 36.75-37.25 on Monday. Choice 975-1325 2-4, 35.00-36.00, up to 35.50-36.50 on Monday. Mixed Good and Choice 950-1175 34.50-35.25. Good 32.25-34.75. Standard to Good Holsteins 32.75-33.00

SLAUGHTER HEIFERS: Mixed Choice and Prime 925-1140 pounds 3-4, 34.50-35.00 on Monday, mostly 34.50-34.75 by Wednesday. Choice 825-1050 2-4, 33.75-34.50, mostly 34.00-34.50. Mixed Good and Choice 775-950 32 50-34.00. Good 30.75-32.50.

COWS: Commercial 22.50-24.50. Utility 23.00-25.50; few High yielding 26.00-26.50. Cutter 21.00-24.50. Canner 18.50-21.00. Shelly-Canner 12.00-18.50.

Delmarva

Wednesday, October 25

Ready-to-cook movement fairly good in most quarters with occasional fill in interest reported unsatisfied. Slaughter schedules about steady. Advance interest good at prices generally ½ cent higher than this week's levels. Less than trucklot prices tended higher within unchanged ranges on both Plant and U.S. Grade A. Live supplies adequate to short of full call with occasional out of state receipts reported filling needs. Weights mostly within desired ranges undertone firm.

Negotiated trucklot prices 2-3 lb. ready-to-cook broiler-fryers for delivery next week: U.S. Grade A -, Plant Grade 27.

Pool trucklot prices for Thursday arrivals: U.S. Grade A 28-31½ Mostly 28½; Plant Grade 27-29½ Mostly 27½

Short: 600-700 pounds 38.75-40.25.

Local Grain

Thursday, October 26

These prices are made up of the average prices quoted by five participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, October 26, 1972 are as follows:

	Bid+	Offered+
Ear Corn, Old	46.33	52.66
Ear Corn, New	32.50	39.00
Shelled Corn	1.49	1.65
Oats, local	.81	.96
Oats, western	1.10	1.18
Barley	1.18	1.42
Wheat	1.80	2.00

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

The proportion of total income (1972) spent for food in the United States will be about 15.5 percent. We are the only nation in the world that spends such a small proportion of total income for food.

From Local Ag Teachers:

Thoughts in Passing

The Article this week was prepared by Robert Woods, teacher of agriculture at Garden Spot High School.

Value of the Work Experience Program

As director of the agricultural work experience program at Garden Spot High School I'd like to take a few moments to explain the tremendous value a program like this can offer to an agriculture student.

As director of the program, it is my job to contact various agribusinesses in the area to set up possible training stations for the student. One of the main purposes of the vocational education program is to provide agriculture students with knowledge and skills which can be applied later for gainful employment in agriculture businesses. This training must be suited to the needs, interests, ability and interest of each individual student.

The classroom and vocational agriculture shop facilities are provided to help the student prepare for future employment but together are some what limited in scope. This is where the supervised work experience program can be extremely beneficial. The director of the program recognizes the abilities and interests of the students and directs him to a work station that fits his interests and abilities.

Cooperative education, as this is commonly called, requires the close planning and cooperation of three major groups: the school, parents and students, and business and industry. With these three groups working closely together a student can successfully be prepared for a career in agriculture industry.

During the senior year in agriculture before beginning work at the cooperating station, which lasts for a period of nine weeks, the student is trained in public relations and employment opportunities related to agriculture. The procedure is followed to help guide the student and help him fit better into the agriculture industry.

Robert Woods

Nest Run Egg Grade Standards Established

The U.S. Department of Agriculture has established a standard for sampling "nest run" eggs to predict grade and size of the entire lot. Nest run eggs are eggs that have not yet been washed, graded, or sorted for size.

Commercial flocks are now generally made up of birds of uniform age and breeding. Such flocks produce eggs relatively uniform in weight and quality, making it feasible to provide sample grading of nest run eggs. Such sample grading, based on the new standard, will make it possible to trade eggs based on size and quality without the time and expense of an initial grading and packaging followed by another grading prior to final sale.

As with all services provided in USDA's Federal-State egg grading program, sample grading of nest run eggs will be voluntary and paid for by the user.

The new standard was proposed Sept. 15 (USDA Press Release 3045-72) and details were published in the Federal Register Sept. 19. Comments were invited from all interested persons.

The standards, which will be published soon in the Federal Register, will become effective Nov. 1. Copies are available from the Poultry Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Weaver Promotes Two

Victor F. Weaver, Inc., New Holland, recently announced two changes in personnel.

Terry N. Mertz, Gordonville RD1, has been promoted to a supervisory position in the Fresh Processing Division. In his new position as assistant foreman, Mertz will be responsible for assisting in the supervision of the eviserating department, an operation that dresses an average of 70,000 birds daily

Donald C. Long, 164 W Main St., Leola, has been named cost accounting supervisor. As supervisor, Long will be responsible for overseeing the cost accounting section and maintaining the company's cost accounting and inventory system.

Long is also currently serving as president of Weaver's Employee Credit Union and is a management advisor to a Weaver sponsored Junior Achievement company.

"Imitation milks are nutritionally inferior to whole milk in their protein, vitamin and mineral content..." according to the American Academy of Pediatrics Committee on Nutrition. Hence, imitation products are unsuitable for infant feeding and inadequate as a replacement for whole milk in young children's diets.

LIMING PAYS and BAKER'S AG LIMESTONE pays off best!

Liming pays off in healthier soil, better crops, stronger and more productive animals. In fact, it has been estimated that each $1 invested in limestone returns from $3 to $10 in bigger and better yields.

Baker's agricultural limestone pays off best because it does more. It sweetens soil to reduce acidity and raise pH level, and it also adds vital magnesium. Both are important to make sure that your crops can make full use of the fertilizers you apply.

Take care of your land, and your land will take care of you. Choose the brand of Baker's agricultural limestone that meets your needs.

	Calcium Oxide	Magnesium Oxide
Conestoga Valley balanced limestone from our Ephrata quarry	36%	14%
Prime Lime dolomite limestone from our Gap quarry	30%	20%
Hy Mag limestone from our Paradise quarry	30%	20%

LANCASTER COUNTY DHIA MONTHLY REPORT

A Registered Holstein cow owned by Rufus G. Martin, Ephrata RD3, completed the highest 305 day lactation. 33 produced 24,258 pounds of milk, 998 pounds of butterfat with a 4.1 per cent test. Second high lactation was completed by a Registered Holstein cow owned by J Mowery Frey Jr , Beaver Valley Pike, Lancaster. Bobbie produced 20,788 pounds of milk, 946 pounds of butterfat with a 4 6 per cent test in 305 days.

The herd of Aaron E Beiler, Paradise RD1, had the highest daily butterfat average This herd of 21 0 Registered and Grade Holstein cows averaged 50 9 pounds of milk, 1.93 pounds of butterfat with a 3 8 per cent test. The herd of J Z. Nolt, Leola RD1, placed second. This herd of 37 9 Registered Holstein cows averaged 47.1 pounds of milk, 1 82 pounds of butterfat with a 3.9 per cent test

Facts for Dairymen

by N. Alan Bair, Assistant County Agricultural Agent

Common Sense Forage Testing - Now

Right now your major concern is probably getting your fall harvesting accomplished, and not setting up your feeding program for the next few months.

I know the next few weeks can be rough. You're a little worried about that last corn silage you put on a stack - it was pretty dry and really didn't get packed too well. Maybe next year the stack will get made earlier when the corn is greener and the drier silage will go in the upright where it will pack better. Right now you must hurry and get a fence around the stack before the cows have a chance to walk over it.

What about that first corn that got picked? Will it keep? Worry about that while you try to make that last alfalfa into hay - sure are only a few drying hours each day! So, get the last corn picked and you can chase the cottontails and ringnecks.

What does all this have to do with forage testing? Well, the rabbits have little to do with it other than the fact that hey do appreciate your growing some good alfalfa for them to eat. The other fall harvesting chores mark the end of the forage harvesting season.

All right, the available forage is in storage. Good! But, is the available forage enough to carry your cows through the winter and spring, and put all the milk in the bucket that you like to see? Some of you have X tons of hay and 3 silos full of silage, but of what quality is this feed? Did you make all the the hay at the right stage of maturity for maximum TDN? How can you be sure of what you actually have to feed this winter? Test your forages!

The money you spend of forage testing is probably your best investment next to your production testing or DHIA fees. It doesn't take too long to recover $6.25 when you look at the price of forages on the market. The proper feeding of your forages this winter cannot be overemphasized.

All right - so you take your forage samples - a representative sample of each kind of forage, and you send them to Penn State. How do you interpret the results? Sure, it's interesting to know that your alfalfa hay was higher in protein than the winner of the local hay show, but what does it really mean? - to you and your cows. There's an easy and good way out of this one. As part of Penn State's forage testing service they will interpret your forage tests for you and at the same time suggest a low-cost grain ration to go with your available forages. This service is at no charge to you if you submit a request with your forage sample or at a later date.

So, I know you're busy, but take a few minutes now to take some good forage samples and send them off with a feeding request form. Next year, take your forage samples all summer and fall while you are harvesting so you have minutes in the fall to hunt rabbits or just sit and think.

Pa. Ag Dept. Announces Research Project Grants

Pennsylvania Secretary of Agriculture Jim McHale announced that contracts for 15 new agricultural research projects totaling $280,000 have been signed this fiscal year, with several of them aimed at improving marketing services for farmers.

McHale said a total of 24 research projects are underway for fiscal year 1972-73, nine of which are being continued from the previous year. The projects, funded in part by an annual appropriation of about $400,000 from harness racing proceeds, are conducted primarily with facilities at Pennsylvania State University, the University of Pennsylvania and the state Department of Agriculture.

"We have some innovative projects this year which I hope will lead to farmers getting a larger share of the retail food dollar," said McHale. "We want to streamline marketing procedures so that farm produce gets to consumer outlets more directly and efficiently. Marketing has been one phase of agriculture that has been ignored too long," McHale added.

The secretary singled out four projects that should be of direct benefit to farm income: "Researching Opportunities for Improving and Expanding Direct Marketing by Agricultural Producers and Processors," contracted with Penn State University; "Regional Agricultural Commodity Trade and Service Center Feasibility Study," with Department of Agriculture; "Feasibility Study for Milk Surplus Plants in western Pennsylvania," Penn State University; and "A Marketing Study, Certification Program, and Development of Production Procedures for Organic Farmers in Pennsylvania," Penn State University.

McHale said he has stressed that project proposals show how they relate to improving farm income. "I am pleased that Penn State and other institutions with fine research facilities have cooperated so well in revamping their research priorities," said McHale.

"Farm parity now stands at about 71 percent, the lowest since depression days, which indicates that production costs have been outstripping gains in gross receipts," McHale explained. "If marketing efficiency had kept pace with production efficiency, farm income could have increased dramatically during the past 20 years."

McHale added that the emphasis on marketing in no way conflicts with the department's traditional concern with farm production. Two other new projects, for example, are the "Control of Corn Stalk Rot" and "Control of Potato Verticillium Wilt," both contracted with Penn State University.

"Eliminating corn stalk rot and potato wilt clearly will increase production of these crops," said McHale. "We do recognize that crops lost to disease obviously hurt a farmer's income and we certainly want research directed at these kinds of problems."

McHale said he was especially pleased with the marketing projects because they should result in better products for consumers as well as increased income for Pennsylvania farmers.

One problem that has plagued Pennsylvania farmers is the concentration of retail food distribution in fewer and larger firms. McHale contends these firms increasingly turn to large growers outside the state to purchase perishable produce.

"As a result of drastic change in the food retailing market structure during the past 40 years," said McHale, "marketing opportunities for Pennsylvania agricultural products other than fluid milk, poultry, eggs and apples have been sharply curtailed."

McHale also noted that the marketing margin for fresh foods moving through conventional channels ranges between 30 and 70 percent of the retail price. "There are indications," said McHale, "that the marketing margin can be substantially narrowed by direct selling operations giving the farmer a greater share of the food dollar. Farmers are only getting 39 cents of the consumer dollar now, an increase of only one cent in ten years," McHale added.

McHale said the direct marketing project will study the concept of a statewide network of publicly owned outlets that would be leased and operated by local marketing corporations. These corporations would be directed by a board made up of local agricultural producers, processors and consumers.

The Regional Agricultural Commodity Trade and Service Center project also concerns direct market outlets but will consider the development of balanced rural communities — Agri-Centers. Studies will be made on fostering the growth of agricultural related facilities such as processing and packaging firms near prime agricultural land which together with farming can be the economic base of planned rural communities.

McHale said the project to study the feasibility of building a plant to process and bottle milk in western Pennsylvania stemmed from meetings with dairymen earlier this year

Such a plant, said McHale, should encourage the regulation of milk supply in the western part of the state which for years has suffered spring surpluses and fall shortages.

The research project to protect organic food producers, said McHale, is another example of improving the link between farmers and consumers.

Freedom Means Abundance

Sooner or later the market price of a product is paid or the product ceases to exist. In the current controversary over the free market versus government controls of such things as prices and wages, the real issue is how far is the U.S. willing to go toward adopting a get-something-for-nothing philosophy.

The folly of such a philosophy has been demonstrated time and again. Years ago the government set out to protect consumers by keeping the price of natural gas at artificially low levels—giving the consumers something for nothing, and many consumers are now getting nothing. The price has been held so low that less and less gas has been produced over the years. A free market would have corrected the situation. Consumers would have had gas although they might have paid a little more for it.

The same relationship holds true in other areas, including food and fiber. The president of the American Farm Bureau Federation, Mr. William J. Kuhfuss, speaking for some 2 million member families of the Farm Bureau, has emphasized that a free market offers abundance at a fair price, something that no system of controls can do. Mr. Kuhfuss uses beef as an example of how freedom in the marketplace works to the advantage of both consumers and producers.

He says, "The feed grain-beef ratio is the best that it has been for many years. The favorable ratio enables the producer to benefit from feeding grain to beef....the number of cattle on feed has increased 14 percent over one year ago. The future supply of beef will be increased. Pay the price and the production increases with a quick and sensitive reaction. When the supply is plentiful you have a discipline on price."

The Farm Bureau leader has again stressed the fundamental principle that no government edict or control can nullify. There is no such thing as getting something for nothing—whether it is fuel for your furnace or food for your family.

Hunting Season

Small game season opens Saturday, field work is slowing up, and it's a sure bet that some farmers will be spending more time with their shotguns than their tractors in the next few weeks

Game is expected to be less plentiful this year than other years because of the spring floods. Like a lot of topsoil, pheasant nests and young rabbits were swept away by the rains of Agnes.

Agnes has complicated the hunting season in another important way. Late-planted corn is still standing in a lot of fields Standing corn attracts pheasants, and pheasants attract hunters.

If you hunt in your own corn field, you're naturally going to be careful. And you'll probably be just as careful if you're in a neighbor's field. Hunters who aren't familiar with farming practices, though, might not realize how important it is not to knock down your corn. This is a potential source of ill will between hunters and farmers.

The Pennsylvania Game Commission is urging all shooters to get land-owners' permission before hunting. If a hunter does ask your permission to hunt, it would be a good idea to give him a few ground rules. Tell him every trampled stalk is money out of your pocket. If you don't want him in your corn at all, tell him so Most hunters are reasonable people who'll respect your wishes.

Fact and Opinion

"Environment is the subtle blending of all those things around us," says the Public Service Company of Colorado "It is the air we breathe, the land on which we walk, the majestic mountain in the distance, the fragrant rose we culture in the garden, the food we eat, the water we drink, the clothes we wear, and much more The power has been given to a man to change his environment for better or worse He can mar it, clutter it, pollute it, destroy it He can beautify it, purify it, fortify and contemplate it in peace and tranquility No longer, however, can he be indifferent to it It is our belief that the electric utility companies have in the past and will continue in the future to contribute immeasurably to an improved environment. Ultimately, electric power and gaseous fuel produced cleanly, dispensed responsibly, and used intelligently will provide all with a healthier, more comfortable environment."

xxx

"We have long had death and taxes as the two standards of inevitability. But there are those who believe that death is the preferable of the two. 'At least', as one man said,'there's one advantage about death; it doesn't get worse every time Congress meets."—Mr. Erwin N. Griswold, Dean, Harvard Law School.

xxx

If food costs had gone up in proportion to take-home pay, U.S consumers would have to pay an average of $286 more per person for food in 1972, according to Secretary of Agriculture Earl Butz.

xxx

If you don't exercise regularly, at least take a 40- or 45-minute walk every other day. Those who follow the advice usually find an increase in their working capacity and decreases in their heart rate, blood pressure and percentage of total body fat. Walking is an exercise that practically everyone can follow without fear of injury or developing excessive fatigue. And if time is your problem, just 10 minutes of jogging each day will produce "unexpected and unprecedented" improvement in your physical condition, suggest studies conducted by a California medical clinic.

xxx

"The greatest dangers to liberty lurk in the insidious encroachment by men of zeal, well-meaning but without understanding."—Associate Justice Brandeis, U.S Supreme Court.

xxx

"Science and technology, used properly, and used wisely, can be among man's great blessings. They are among the servants of man, and not his master. Used improperly and unwisely, as they have often been used in the past, science and technology can be among mankind's greatest problems."—Mr. A.H. Aymond, Chairman of the Board, Consumers Power Company.

xxx

The author and American statesman, Henry Cabot Lodge, in 1884 remarked, "Of'Americanism' of the right sort we cannot have too much. Mere vaporism amd boasting become a nation as little as a man. But honest, outspoken pride and faith in our country are infinitely to be respected."

xxx

"The longer I live, the more convinced I am that material progress is not only valueless without spiritual progress; it is, in the term, impossible."—Mr. Eugene Holman.

To Control Rats

Weather conditions will soon be driving rats and mice from the field into buildings for the winter. Good management does not have any place for these rodents. Farmers are urged to eliminate all possible nesting places by cleaning up the premises, doing some concreting of broken walks, floors, and etc. and not giving the rats a chance to move into winter quarters. Rats are filthy creatures that can do considerable damage to both man and beast. A good sanitation program, along with poison bait stations, will keep down the population. In case of very heavy infestations commercial exterminators can be hired to eradicate the rodents. Don't try to put up with them this winter.

To Protect Water Pipes

Colder weather has arrived and exposed water lines will freeze and give plenty of trouble. Prevention is much easier than the correction of the problem. Pipes may be buried at least 24 inches below the surface or they may be wrapped with electric heating cable to keep them from freezing. These cables work fine but should not be cut or spliced unless done by an electrician, or someone with knowledge of the material; they may be a fire hazard when improperly used. The thawing of water pipes in a blizzard or when temperatures are near zero is very unpleasant. Prevention pratices now will save time and possible damage.

To Be Careful With Silo Unloaders

Observing a heavy silo unloader dangling from a thread-like cable from the top of a silo the other day reminded me of the possible danger of working under this equipment. We are told that the steel cables are very strong and will last for years, but I have known them to break and allow the equipment to fall to the bottom of the silo. Silage feeders are advised to check the condition of this cable frequently and especially when the silo is getting empty and the unloader about to be wenched to the top again; also regular oiling or greasing is suggested. Serious injury could result if the cable snaps unexpectedly.

To Segregate Livestock

Newly purchased cattle may be carrying a number of infections that can easily spread to the rest of the herd. Prices are high on all types of beef and dairy cattle and special care is needed to prevent serious losses. Cattle feeders should take special effort to keep new cattle from contacting or eating from the same trough as acclimated cattle. Careful observation of cattle several times each day for the first several weeks is strongly advised: Prompt treatment is much more successful than waiting until the animal is seriously weakened. The "Eye of the Master" was never more important.

LIVING FREE

Lesson for October 29, 1972

Background Scripture: 2 Chronicales 10: 1-16, Romans 13 1-7, Peter 2 11-17
Devotional Reading Psalms 2.

The early Apostles were often at odds and in trouble with the state. Christians were often considered subversive and some, in order to remain faithful to Christ, paid the supreme sacrifice of their own lives.

Rev. Althouse

Yet despite this occasional conflict between spiritual and secular authority, Christians continued to value the role of governmental authority. No one seemed to be more aware of this than Paul who looked upon the Roman empire as a means through which the will of God was performed in the world.

The blessings of peace

Wherever he traveled, Paul observed that the Roman government had established a just law and order wherever it ruled. It was thus safe for people to travel from one area to another within the Empire without undue fear of harassment. For all its faults, the government of Rome brought peace and order to the world.

Therefore, Paul saw the institution of government as a blessing from God given to man, enabling him to live in a stable world. God desires for his world peace, law, order, and justice, and human governmental institutions are instruments through which God can accomplish this purpose. Because man is not perfectly good, but is a sinner, because he can in his rebelliousness against God cause much misery and harm to others, he needs some sources of authority in this world to help him to live in obedience to God's will We wish all men would always want to do the right thing, but they don't and so we need governors and government to help us along that line.

No pretext for evil

There are only two alternatives: human government or chaos, order or anarchy. Because of man's moral imperfection, Paul knew that men cannot live together peacably and justly in the long-run without some kind of structure or government. He had occasion to witness how men can lose their senses in a mob and go out of control when there is nothing to restrain them. Lack of law and order eventually brings out the worst in men.

God has often used men in authority who had not the slightest idea they were doing his will. Thus, even a governor who does not acknowledge God or try to live by his will, may still be used to achieve God's purpose.

Unfortunately, there are always those who feel that they do not need to give any loyalty to anyone but God himself. "We are free!" they remind us. Yet for many, freedom is merely a pretext for evil. To be caught in that bind is the worst kind of slavery or bondage. To be truly living free means to obey God's will wherever we find it.

Schedule of Events Keystone Livestock Exposition

BEEF CATTLE

Sunday, November 5

1:30 p.m. - All Eastern Junior Beef Breeding

Monday, November 6

8:00 a.m. - Carcass Steers On-Foot

9:00 a.m. - Junior Steers (4-H and FFA)

1:00 - Open Class Steer Show

3:30 p.m. - Grand Champion Steer

Tuesday, November 7

9:00 a.m. - Angus Breeding Cattle

9:00 a.m. - Shorthorn Breeding Cattle

1:30 p.m. - Continuation, Angus Shorthorn Show

2:00 p.m. - Feeder Calves

Wednesday, November 8

9:00 a.m. - Hereford Breeding Cattle

9:00 a.m. - Polled Hereford (SOP) Breeding Cattle

1:00 p.m. - Continuation, Hereford Polled Hereford Show

Thursday, November 9

9:00 a.m. - Charolais Breeding Cattle

1:00 p.m. - Continuation, Charolais Show

1:00 p.m. - Feeder Calf Sale

SHEEP

Sunday, November 5

8:00 p.m. Ladies Lead Class

Monday, November 6

9:00 a.m. - Carcass Wethers On-Foot

11:00 a.m. - Truckload 15 Market Lambs

11:15 a.m. - Junior Market Lambs

Monday, November 6

10:00 a.m. - Arabian Halter Classes

6:00 p m. - Arabian Performance Classes

Tuesday, November 7

10:00 a.m - Appaloosa Halter Classes

6:00 p.m. - Appaloosa Performance Classes

Thursday, November 9

8:30 a.m. - Pennsylvania State 4-H Horse Show

7:30 p.m. - Pennsylvania State 4-H Horse Show

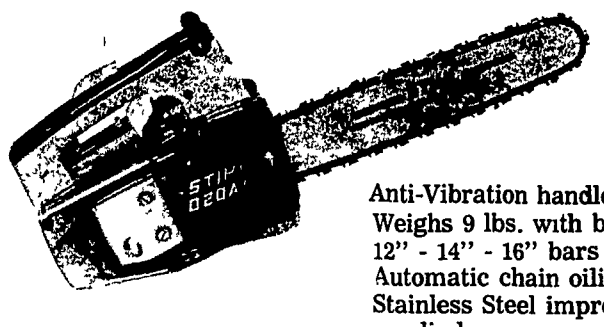
Friday, November 10

8:30 a.m. - Pennsylvania State 4-H Horse Show

Scratches on Non-Stick Finishes

Scratches may affect the appearance of non-stick utensils, but they make little or no difference in the performance of the utensil. Extension home management specialists at Pennsylvania State University explain that since non-stick finishes are so flexible, scratches don't open into wide gaps or cause chipping or peeling. Despite scratches, pans with a non-stick finish are still easy to clean and give good service.

THE ALL NEW STIHL 020AV CHAIN SAW



Anti-Vibration handle
Weighs 9 lbs. with bar & chain
12" - 14" - 16" bars available
Automatic chain oiling
Stainless Steel impreginated cylinder

Replace bar and Chain with a 22" Hedge Trimmer attachment, giving you greater use of your Stihl saw.

This
is when you
get that
good feeling

This is pay day.

This is when it all comes back.

The fertilizer. The seed. The interest. The machinery. The thinking. The *work*.

With a profit, if all the inputs did their jobs.

The *seed* is a key. Some hybrids have a superior capacity to produce. To give you *more* corn, from the *same* soil and season.

Profit-minded corn growers have learned Funk's G-Hybrids can be depended upon to do just that. To produce top yields. Year after year. Dependably. In good seasons and—like many years—when conditions are tough at critical times.

Year after year, corn growers with Funk's-G at work in their fields have that *good feeling*.

That good feeling you get when you have dependable hybrids, from dependable people. Funk's G-Hybrids.

Pomona Grange Adopts Resolutions

Lancaster County Pomona Grange 71 met in regular session at Fulton Grange Hall, Oakryn, October 21 as guests of Fulton Grange. Pomona Master, Jesse Wood, conducted the business session when the following resolutions were adopted:

(1) WHEREAS, The voters of Lancaster County will be voting on the question of whether a committee shall be elected to study our present form of government and advise the electors of their findings. And

WHEREAS, Under Act 62 which establishes procedures for adopting Home Rule Charters or optional plans, this committee may recommend a charter providing for any type of governmental structure deemed suitable to meet our county's need except it must include a governing body chosen by popular election. And

WHEREAS, The adoption of a Home Rule Charter or any of the optional plans would do nothing more than increase our taxes and do away with alot of our present local home rule. And

WHEREAS, Our present form of government consisting of three commissioners, two from one party and one from the other, is by far the best and most economical form of government. Be it

RESOLVED, That Lancaster County Pomona Grange oppose the election of a study commission and urge all voters to vote against it at the coming election

(2) WHEREAS, Lancaster County is confronted with the possibility of five operating nuclear reactors: three at Peach Bottom, York County; two at Three Mile Island, Dauphin County; and more near Peach Bottom, Lancaster County.

WHEREAS, With such a concentration of such plants the possibilities of a serious accident occurring at any of these locations could result in the death or injury of thousands of people in our county. And

WHEREAS, There is presently no law to prevent a utility from placing a power plant anywhere it pleases. And

WHEREAS, Save Solanco's Environment Committee has done much to bring this problem to the attention of all concerned. Be it

RESOLVED, That Lancaster County Pomona Grange 71 asks our County Commissioners to place this issue on the county ballot at our April 1973 election and thereby get a fair referendum of the feeling of the people on this potential hazard.

The Lecturer, Mrs. Jesse Wood presented a program on Autumn. Mrs. J. Stanley Stauffer Jr. read a poem entitled "October". Mrs. Wood read "Autumn".

David Adsitt gave a talk and demonstration on "Making Fall Flower Arrangements". He exhibited several arrangements, dried flowers and materials. The Galbreath sisters, Mrs. David Knight, Misses Joyce, Peggy and Sandra Galbreath sang "Trust And Obey." They were accompanied by their mother, Mrs. Thomas Galbreath.

Mr. and Mrs. Richard Holloway and Mrs. Clifford Holloway Jr. presented a skit. Mrs. Owen Groff gave a monologue "My Mamma Was An Ecologist". Mrs. Richard Maule gave a reading.

Mr. and Mrs. Jesse Wood represented Lancaster County Pomona Grange at the Pennsylvania State Grange convention at Williamsport this week.

Wineka Elected To Agway Board

Benajamin Wineka, a farmer from Red Lion, was elected to a three-year term on the board of directors of Agway Inc. at the cooperative's eighth annual meeting, Oct 19-20, in Syracuse, N.Y.

He succeeds Willis Z. Esbenshade of Lancaster, Pa., and represents Perry, Cumberland, Franklin, Adams, York and Lancaster Counties in Pennsylvania and Washington, Carroll, Frederick, Baltimore and Harford Counties in Maryland.

A member of the Agway board from 1964 to 1966, Wineka served on the Agway Council, an advisory body of farmers, from 1966 to 1972

He maintains 2,500 layers and 4,000 broilers and raises vegetables and grains on his farm. Active in growers' and church organizations, Wineka is a director of the New Eastern Market and the York County Poultry Association and is president of the York County Vegetable Growers Association.

4 New Sound-Idea Tractors Featuring Sound-Gard body... a world apart from any old cab

It's not incomplete like a cab. It's a total body—the John Deere Sound-Gard body, a complete unit with seat, all controls, and instrument panel intact . . . a total body like that on your car and pickup. Sound-Gard body attaches firmly to the tractor . . . yet it isolates you from that tractor. It's actually free to flex slightly when you're on rough ground. Noise level is down to 85 dB(A) so you can easily hear the optional radio or 8-track stereo tape player. Equip Sound-Gard body with heater and air-conditioner and you have total temperature control winter and summer. Sound-Gard body—one of the many sound ideas in new John Deere 4030, 4230, 4430, and 4630 Tractors. Stop in soon and get the full story.

(Continued From Page 1)

was a vote for home rule. "The people who stand the best chance of getting onto the study commission," he said, "are the ones who've been endorsed by the politicians. And the ones who were endorsed are in favor of home rule."

Weaver stuck to his guns. He claimed the study commission, if it was formed, would be beholden to no particular cause, party or person. Their task would be to deliberate the home rule issue and either adopt a home rule charter or decide that the present form of government was the best possible government for the county.

"The county government today is just an arm of the state legislature," Weaver said. "Maybe that's the best way to do things. I don't think it is. But unless we vote for a commission, we're never going to decide for sure whether or not we want home rule. Nobody's going to be happy."

One drawback of the present system, Weaver feels, is that the state mandates which county government offices must be elected. This results in some redundancy which might be eliminated if the counties were allowed to determine their own governmental needs.

An example Weaver gave was that the county was now required to have both a clerk of the courts to handle criminal court records, and a prothonatary to handle civil court records. "We used to pay these offices around $12,000 a year," he said. "Last year the state said we've got to pay them $17,500 a year. We had no choice in the matter. Here we've got two offices doing work that could be accomplished in one office, and it's costing us $35,000 a year. Last year, because of changes like this, the state forced us to add $76,000 to our budget. We wouldn't have these problems with home rule."

Weaver pointed out that today every elected official is more or less his own boss. He feels that a central administrative head would be able to consolidate offices, eliminate governmental redundancies, and give the county better government with a smaller price tag.

Another objection he has to the present system is that too much power rests in too few hands. "There are three county commissioners," Weaver said. "Two of those commissioners form a majority, and a majority of two is all you need to slap a bond indebtedness on every citizen in Lancaster County.

"For example, the Conestoga View Nursing home required a $4.7 million bond issue. All three commissioners voted for the nursing home, but it could have gone through with just two votes. The same was true for the prison remodeling project which cost $2.4 million. That's just too much power, too much responsiblity in too few hands. There are no checks and balances to this system.

Weaver pointed out that if home rule were adopted, the state would still have certain powers which couldn't be changed by local municipalities. Counties cannot change boundaries between municipalities, they cannot alter the subjects of taxes nor the nature of assessments; they cannot devise their own public school regulations, change eminent domain procedures, nor tamper with the penal code

PennAg Slates 1973 Directory

PennAg Industries Association has announced the publication of its 21st annual Manual and Directory. The 200-page book will list all Pennsylvania agribusiness firms alphabetically as well as by city and county. It will also contain information on taxes, licensing fees and regulations, laws and the names of agricultural experts.

The publication date has been set for January 25, with a cut-off date for submitting advertisements of December 15.

Dairy Meeting Postponed

The dairy herd health meeting orginnally scheduled for November 2 at the Farm and Home Center has been postponed.

The meeting, featuring Dr. Sam Guss from Penn State, will be scheduled at a later date to discuss current herd health problems.

In 1611, nine years before the Pilgrims arrived at Plymouth, the first dairy cattle were brought to Jamestown. A census made in the Virginia colony in 1625 recorded 364 cows.

M. E. SNAVELY

445 South Cedar St., Lititz, Pa. 17543 Ph. 626-8144

Governor Milton Shapp recently signed a proclaimation naming the week of November 5 Pennsylvania Young Farmer Week. With the governor at the signature ceremony were seated left to right: Jay Foreman, PYFA President, Shapp, Donald Grove, PYFA Secretary. 2nd Row: Mr. George Love, Assistant Commissioner for Basic Education, Jap Kopp PYFA Treasurer, Henry Givler, Vocational Education Consultant. 3rd Row: Carl E. Herr, Consultant Adult Vocational Education, Thomas L. Rowland, Administrative Assistant for Planning Pa. Dept. of Agriculture, John Campbell, Director of Public Relations, Dr. John W. Struck, State Director of Vocational Education.

Gov. Shapp Proclaims Young Farmer Week

The week beginning November 5 has been proclaimed Pennsylvania Young Farmer Week by governor Milton Shapp Shapp signed the proclamation in Harrisburg recently, while PYFA members and representatives of various state agencies looked on.

The proclaimation read:

Agriculture is a basic and vital part of our economy.

Capable and well-educated leadership is needed to maintain and improve the efficiency of American agricultural production for the benefit of both producers and consumers.

The Pennsylvania Young Farmers Association is organized through the Vocational Agriculture Programs in the public schools for the purpose of providing continued educational opportunities for the young farm families.

Young farmer programs in local communities provide technical information, develop civic responsibilities, and promote rural-urban understanding.

The Pennsylvania Young Farmers Association enables young farm families throughout the State to associate together in frequent planned meetings, whereby they gain new ideas, create new friendships, and acquire valuable experiences.

The Achievements of the Pennsylvania Young Farmers Association merit public recognition.

Therefore, I, Milton J. Shapp, Governor of the Commonwealth of Pennsylvania, do hereby proclaim the week of November 5-11, 1972, as PENNSYLVANIA YOUNG FARMERS WEEK in Pennsylvania, and urge all our citizens to assist in according this observance the attention and importance which it fully merits for its community, county and State-wide service.

Carroll Kirby, Royster Company District Manager, presents a certificate for a load of Royster Bonanza fertilizer for use in the Lancaster County Central Park. Accepting the certificate is Edward Swaar, County Park Director; and Raymond G. Herr, County Commissioner. Royster is erecting a new $1 million plant in East Hempfield Township.

Add an extra money-making month to your year!

Unipel 20-10-10 high-nitrogen fertilizer lets you increase the value of Fall plowing.

Now there is a unique fertilizer that is ideal for Fall plowdown. It is Unipel 20-10-10. With Unipel fertilizer, you can do it all in the Fall. One pass across the field and you've got your entire basic fertilization job completed.

Ordinary fertilizer is a collection of ingredients. You scatter it and hope your land gets the right proportions of each. But Unipel fertilizer is different. Each and every pellet contains the precise ratio of guaranteed nutrients. When plant roots come across a Unipel granule, they get a complete three-course meal. So it just figures that Unipel fertilizer gets plants off to a faster, stronger start.

And plants get a steady supply of nutrients throughout the growing season, because Unipel fertilizer is formulated to give timed-release of ingredients.

So now you can do it all in the Fall and be on your way to bigger yields when you harvest next year. We'll be around soon with the whole story.

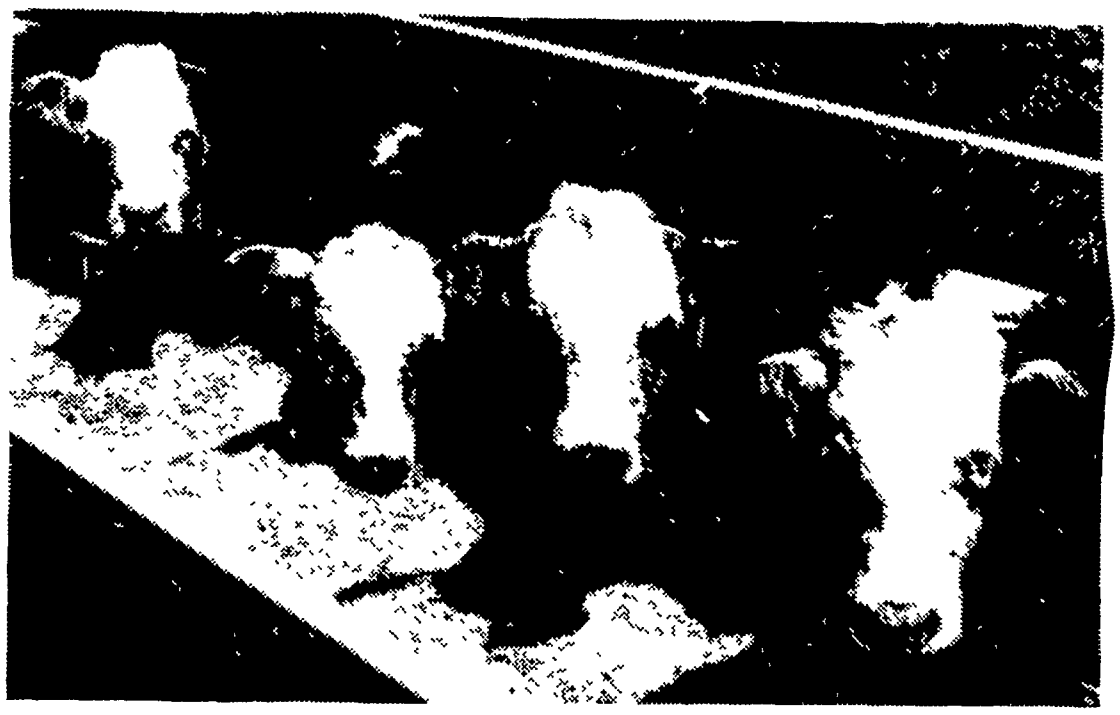
ATTENTION BEEFMEN



You Are Invited To Attend A

MASTER MIX BEEF SEMINAR

ON WEDNESDAY, NOV. 1, 1972

at the Lancaster Farm and Home Center
Lancaster, Pa. starting at 7:00 P.M.

Speakers will be:

Dr. Stillabower - Research Veterinarian For Central Soya Co. on "Feedlot Health Programs".

Mr. William Grieve - Tuco Co. on "Feed Lot Additives".

and

Charles Frendt - on "Feeding Programs".

SEMINAR WILL BE FOLLOWED BY A BUFFET LUNCHEON AND AN OPPORTUNITY TO ASK QUESTIONS.

If you Can Attend Please Notify One of the Following Master Mix Dealers.

Farm Show Parking Problems Solved

The 57th Pennsylvania State Farm Show will be held as scheduled January 8-12, with ample parking for all visitors, it was announced by Wellington D Smith, state Farm Show director

Smith said some people have expressed concern that the Farm Show building complex, inundated with 80 inches of water when tropical storm Agnes struck in June, would not be ready for the annual agricultural event

"There is no doubt about having a farm show this year," Smith said "In fact, our fall schedule of events has proceeded as originally planned"

Smith said about 50 percent of the parking area is now being used by the City of Harrisburg for trailers to house the city's flood victims

To offset this loss of parking area, said Smith, officials at Harrisburg Area Community College have agreed to close the school during farm show week and make its parking lot available to Farm Show visitors "This added parking area will replace what we have lost to the trailers," Smith said.

The college is about 1½ miles from the farm show complex and Smith said shuttle buses will be used to transport visitors to and from their cars.

Smith said the farm show complex is still in need of minor work such as painting and tiling, which should be completed by the end of December. "But we were back in full operation more than a month ago when we installed two transformers," Smith added.

The director elaborated that such events as the All American Dairy Show, the Standardbred Horse Sale and the Hardware Show were all held as scheduled in September and October. "And right now we have the Penn National Horse Show."

As for the annual Farm Show, Smith said the premium lists have been mailed out and entries are already coming in.

Smith noted that signs and equipment stored by exhibitors at the farm show complex were destroyed by the flood. He asked that exhibitors, therefore, contact him about getting new signs printed and painted in time for the Farm Show.

HALES & HUNTER CO.
FEED LETTER
WET DAIRY FEED!

No we're not talking about the flood. We're talking about the moisture normally found in any dairy feed.

Some feeds run as high as 65 percent water (silage), and some as low as 10 percent water (hay).

Grain mixes fall some where in between unless the manufacturer goes to the trouble of taking the moisture out of the mix. Pioneer sets as its maximum 11 percent.

Using 15 percent moisture corn, a home made feed may end up containing as much as 14 percent water. Every hundred pounds of this feed may have 3 pounds more water than 100 pounds of Pioneer. If a dairy cow uses one pound of dry matter to make 3 pounds of milk there could be 9 more pounds of milk in a bag of Pioneer than in a hundred pounds of the home made feed, couldn't it?

KIND OF MAKES A BODY WONDER, DON'T IT?

PSU Schedules Milking School

A three-day Milking School will be held at The Pennsylvania State University, November 8, 9 and 10. Members of the Extension staff and faculty of the College of Agriculture will instruct in a wide variety of subjects which are aimed at improving the techniques and skills of milkers.

The subjects that will be taught during the three-day school are:

Wednesday, November 8 - The Dairy Industry Today, Anatomy and Development of the Udder; Visit and Milking Facilities, and Mastitis - the Disease

Thursday, November 9 - Air Flow and Vacuum, Hormonal Control of Lactation, Equipment Maintenance, Hormonal Control of Let Down; and visit milking facilities

Friday, November 10 - The Man and Milking Machine, Cow psychology, Cleaning Principles, and Summary and Questions

Pre-registration for this course is necessary, and anyone interested in attending is urged to register by Nov 1

Most of the classes will be held in Borland Laboratory Registration fee for the course is ten dollars For further information, contact the Agricultural Conference Coordinator, 410 J O Keller Building, The Pennsylvania State University, University Park, Pa 16802

Green Dragon Dairy Show and Sale

The Green Dragon market held its annual Dairy Cow Show and Sale Friday, October 20

The top price paid for an animal was the grand champion, a fresh Holstein purchased by Jacob Zook, Port Royal RD1, for $2,050. The animal was shown by Norman Kolb, Lancaster

Other animals consigned for the annual sale by their owners and the buyers included:

Holstein Class

Fresh Cows — Second, Alfred Albright, Landisburg, to Jacob Zook, $950, third, Carl Hostetter, Annville RD2, to Paul Horning, Stevens RD1, $900; fourth, Bob Kennedy, Gibsonia, to Charles Myers, Lancaster, $1,200.

Dry Cows — First, Alfred Albright to Sherman Glick, Lewistown RD3, $900; second, Norman Kolb to Jonas King, Gordonville, $870; third, Alfred Albright to Kenneth Deamer, Thompsontown, $870, fourth, Alfred Albright to Harold Imhoff, Stevens RD1, $730.

Mixed Breeds

First, Bob Kennedy, purchased by Clarence Stoner, Jonestown RD1, $1,010, second, Alfred Albright to Mark Ebersole, Lebanon RD5, $750; third, J. Richard Zimmerman, Plainfield to Melvin Kolb, $600; fourth, Roy Mummert, Hanover RD4 to Art Kling, Landisburg, $600

Guernsey Class

First, Bob Kennedy, purchased by Morgan Spahr, York RD, $460; second, C. Loose and M. Weaver, Ephrata, by Norman Kolb, $350; third, John Fry, Ephrata, to Elmer Bachman, Lebanon RD4, $380, fourth, John Fry, Ephrata, to Harold Imhoff, $440.

Serving as judges for the show were Fred Naugle, Carlisle, pedigree reader, Paul Zimmerman, Ephrata RD1, and Jacob Zook, Port Royal RD1. Manager of the show and sale was Walter Risser, Palmyra RD2

RED ROSE DAIRY FEEDS AND SUPPLEMENTS

.. ARE THE FEEDS YOU NEED TO PUT MORE MILK IN THE PAIL!

Take Red Rose 14 Test Cow Feed, for example. This course-textured feed can be fed to your milking cows, dry cows, calves and bulls. It's an all-purpose feed to be fed at all seasons. Other Red Rose Dairy Feeds are available in many protein levels — and one should fit your particular need. Let your Red Rose dealer help you select the one best suited to your herd.

YOUR COWS NEED MINERALS!

Red Rose Free-Choice Mineral is recommended when there is heavy use of corn silage. Red Rose Super Mineral is designed for herds where legume roughage is fed. **Remember** — include Red Rose Minerals in your feeding program!

ED ESHLEMAN'S WASHINGTON REPORT

In the closing hours of the 92nd Congress, Social Security Amendments were one of the major things under consideration. Most of these amendments had first passed the House of Representatives last year as a part of the bill H.R. 1. But you may remember that H.R. 1 also contained the Administration's controversial welfare program when it passed the House.

The Senate tied the bill up debating the welfare provisions. Therefore, we came down to the last minute before H R. 1 received final consideration and then only because the welfare provisions were totally eliminated from the legislation

Even without the welfare sections, H R 1 was a major bill because it expanded Social Security and Medicare benefits and increased payroll taxes to pay for them Since there is sure to be wide general interest in some of these changes, I thought this column should be used to outline some of the major provisions in the legislation

The minimum monthly benefit for certain Social Security recipients was raised to $170 per month ($255 for a couple). The recipients covered by this change are those who had long years in low income employment. Their increased benefits would begin in January, 1973.

Widow's and dependent widower's benefits were raised from 82.5 percent to 100 percent of the deceased spouse's entitlement. A widow whose benefits start at age 65 or after would receive 100 percent of her deceased husband's primary insurance amount, or - if his benefits began before age 65 - an amount equal to the reduced benefit he would have been receiving if he were alive. Under the bill, the benefit for a widow who comes on the rolls between 60 and 65 would be reduced proportionately to take account of the longer period over which the benefit would be paid January, 1973 is the date when this provision becomes effective

The bill permits earnings up to $2100 per year without a loss in Social Security benefits. The present earning limit is $1680 For earnings above $2100, a reduction in benefits of $1 for each $2 of earnings is included which provides a greater work incentive than exists under present law.

There was a reduction in the waiting period for disability benefits. The present six-month eligibility period for receiving disability checks is reduced to five months effective January, 1973.

Disability benefit beneficiaries will be covered under medicare as of July 1, 1973. The bill provides for medicare coverage of a disability beneficiary after he has been entitled to benefits for not less than 24 consecutive months. Persons covered by this provision include: disabled workers at any age; disabled widows and disabled dependent widowers between ages of 50 and 65; beneficiaries age 18 or older who recieve benefits because of a disability received prior to attaining age 22; and disabled qualified railroad retirees.

Campbell Cites Value Of Growing Agriculture

The agriculture of tomorrow—an expanding agriculture aggressively seeking to help meet world needs—is being developed today in America, Under Secretary of Agriculture J. Phil Campbell said last week in Knoxville, Tenn.

"With this emphasis on an expanding agriculture, we have cut in half the rate of decline in farm numbers," Mr. Campbell said. "With an expanding agriculture, we are laying the best foundation for the sound development of rural America.

"For an expanding agriculture, we have worked hard to expand exports—and these efforts have paid off."

For the 23rd Annual Convention of the Burley and Dark Leaf Tobacco Export Association, Mr Campbell outlined the role of the tobacco farmer in an expanding agriculture.

"Your role is to meet an increasing demand, both here and abroad, for tobacco," Mr. Campbell said. "It's as simple as that. When the world stops wanting the finest tobacco ever made, it will no longer need you. I do not forsee that time.

"On the other hand, I do not forsee an exploding demand for your product. While U. S. production of cigarettes—which absorbs 80 percent of the burley supply—is expected to increase somewhat this fiscal year, overall leaf exports may decline. However, foreign demand for burley continues to grow but an increasing share is being supplied by foreign producers, often at prices less than half the U. S. levels."

The challenges facing the American tobacco producer are tremendous, Mr. Campbell said. They include reducing the cost of production, foreign trade barriers, health concerns and the reduction of the amount of tobacco in cigarettes.

"Yet there is a demand to be filled," the Under Secretary asserted "Your initiative and propensity for hard work have helped fill that demand for more than 350 years

"We stand today as the world's largest exporter of tobacco In fact, our exports account for about one-third of the world's tobacco trade. In fiscal year 1972 U.S exports of tobacco and tobacco products were a record $764 million.

"At the same time, U S. imports of tobacco and tobacco products last year were valued at $167 million. Thus, U.S. foreign trade in tobacco resulted in a net favorable balance of about $597 million.

"Our burley exports of over 44 million pounds—worth $50 million—were up 10 percent in quantity and 20 percent in value compared to fiscal year 1971. Likewise, our exports of Kentucky-Tennessee fire-cured—at about 22 million pounds, worth $16 million—were up 17 percent in quantity and 28 percent in value from fiscal 1971.

"To paraphrase a well-known saying: The reports of your demise have been greatly exaggerated.

"Although tobacco utilizes only three-tenths of a percent of the Nation's cropland, it is usually the fourth or fifth most valuable crop and accounts for about six percent of cash receipts from all U.S. crops."

With 600,000 U.S. farm families sharing in the proceeds from the sale of tobacco, Mr. Campbell noted, the tobacco industry plays a major role in the economy of an ever-changing, ever-growing Southland.

"The South has thrived on change," he said. "As the Agricultural Act of 1970 gave farmers more freedom to shift their cropping patterns, cotton production began a near revolutionary shift toward the most efficient production areas, such as the Mississippi Delta and the High Plains and Rolling Plains of Texas Southern Plains producers planted more sorghums for their rapidly growing livestock industry. Midsouth producers expanded their soybean production in response to good soybean market prospects.

"Such production shifts help make U.S. agriculture more efficient and more competitive, a vital point in an industry which depends heavily upon exports

"Similarly, the President has expanded opportunities for world trade and world peace through his visits to China and Russia as well as his removal of the requirement that 50 percent of all United States wheat and feed grain exports to the Soviet Union and certain other Communist destinations be carried in United States ships

"Also, his initiatives that resulted in adjustments in world currency rates made American agricultural commodities more competitive in price on world markets

"Such peace and trade initiatives at home and abroad are expanding the promise of American agriculture. They are good news for every aspect of agriculture and rural development

"Perhaps more than many others, the American farmer benefits from world peace and expanding trade and certainly the development of rural America depends upon a prosperous agriculture

"One of the most stable components of the South's accelerating economy is its successful tobacco industry. And the South is growing rapidly in opportunity and in many aspects of life quality.

"The South was attractive enough to have experienced a 112,000-person net inmigration in the Sixties. It is industrializing at a faster rate than the rest of the country. In terms of real income, the South has almost or already reached parity with national averages.

"Yes, the policy of an expanding agriculture that puts more money in the farmer's pockets and allows them the freedom to manage their farms as they see best—that kind of agricultural policy is helping to build a better America."

Mr. Campbell said Secretary of Agriculture Earl L Butz has "done a great job of presenting the farmers' case to the White House and the President has backed him up in resisting pressure to put price ceilings on first-time sales of raw agricultural products, which in the long run would have been bad not only for farmers but for the Nation's consumers.

"With this kind of leadership, the breakthroughs of 1972 promise brighter horizons for American agriculture," Mr. Campbell concluded

PFA Policy Comm. Meets

The PFA Policy Development Committee met Thursday and Friday in Carlisle at the Embers Restaurant to assimilate policy suggestions for the Pennsylvania Farmers' Association (PFA) The 48-member committee will present the policy suggestions to the voting delegates at the organization's 22nd Annual Meeting November 12-15 at the Penn Harris Motel.

PFA is a general farm organization with more than 16,000 family members in the Keystone State, and it is affiliated with the American Farm Bureau Federation. PFA has 48 local associations throughout the state. Each County Farmers' Association has a representative on the committee.

HERE'S THE CORN

V2642 - 119 day maturity
A Champion. Short-stalked, upright leaf, with a really high yield and potential. Moderately high population

V2592 - 118 day maturity
By demand. A special hybrid for the East, large-eared, excellent stalk, and fast drying.

V2552 - 113 day maturity
This is a high population hybrid. Pour on the fertilizer, early tasseling and silking a high yielder.

V2402 - 102 day maturity
The big yielder. Tough to beat anywhere. Indiana reports over 200 bushels yield. Early plant hybrid.

V2332 - 94 day maturity
Tremendous yield potential. Early. Fast drying. High yielder. Picks and shells beautifully.

State 4-H Horse Show Entrants

The State 4-H Horse Show will be held in the Farm Show Building on November 9 and 10.

The following are Lancaster County entries and their classes: Wylie Baker, 15, 21; Cindy Burkey, 1, Jeff Fellenbaum, 8; Cheryl Gernert, 7, James Glick, 1.

David Good, 8, Debra Heidig, 2, Dana Norquist, 15, and Donna Sammons, 20

Emergency Feed Program Approved

The emergency livestock feed program has been approved for Lancaster County because of losses to feed grain and forage crops.

To be eligible for participation in the program, the farmer must meet each of four criterias:

1. His feed supplies are insufficient.

2 A serious loss of feed was suffered because of flood or drought.

3. Purchases of feed substantially larger than usual are necessary.

4 It would cause an undue financial hardship for him to obtain sufficient feed through normal trade channels.

Only the owner of the livestock is eligible to apply. All livestock must have been owned at least six months or have been purchased as replacement breeding stock.

Those eligible will be able to purchase corn at $33.20 per ton and oats at $30.00 per ton for primary livestock. This includes dairy cows two years old or more, other cows and bulls for breeding replacement yearlings and calves, sheep and goats for breeding and replacement lambs and kids.

They may also purchase corn at $46.40 per ton and oats at $40.00 per ton for secondary livestock. These are other cattle two years old or more, all other yearlings, calves, sheep, goats and lambs, sows and hogs on full grain ration, other swine and mules and horses raised for work.

Farmers who do not have enough feed because of weather conditions, should file application at the ASCS office. The information we will need is the number of head and kind of livestock, all grain, hay and silage on hand, and the normal purchases and production of grain, hay and silage.

Livestock feed applications will be reviewed and approvals determined by the County ASC Committee. Approved feed may be purchased as whole grain or processed feed.

4-H Dairy Banquet

The annual Lancaster County 4-H dairy Banquet will be held Friday evening, November 3 at the Good 'n Plenty Restaurant on Route 896.

This annual banquet will feature the recognition of 4-H dairy club members who have had outstanding achievement throughout the past year

Banquet tickets are available from all 4-H dairy leaders in the County at the price of $3 50 per person All tickets must be purchased prior to October 30

All County 4-H dairy club members along with their families and friends are encouraged to attend The Ayrshire, Jersey, Brown Swiss Club is this years banquet host

4-H NEWS

Chester Co. 4-H'ers Honored At Achievement Banquet

Becky Robinson, daughter of Mr. and Mrs. Wilfred Robinson, West Grove, and Dale Nafziger, son of Mr. and Mrs. David Nafziger, Phoenixville, who have compiled a top 4-H record in club, county, and state 4-H events as teen leaders, were named Chester County's outstanding 4-H Girl and Boy. Their awards were presented recently at the Chester County 4-H Achievement Banquet held at the Central Chester County Vocational-Technical School.

Named recipients of the "I Dare You" award for leadership and citizenship were Libby Ekdahl, daughter of Mr. and Mrs. George Ekdahl, West Chester, and W. Hosea Latshaw, son of Mr. and Mrs. Walter Latshaw, Spring City.

County winners in the National Awards Program, sponsored by leading corporations in the United States to honor 4-H members who have excelled in particular areas of 4-H were: Achievement and Citizenship - Nancy Wollaston, Toughkenamon, and Dale Nafziger; Alumni - William Holloway, West Chester; Dairy Foods and Veterinary Science - Holly Scheib, Phoenixville; Entomology and Food Preservation - Tina Kulp, Pottstown

Dress Revue - Susan Buonanno, Phoenixville; Cindy Chrisman, Phoenixville; Jayne Henssler, Chester Springs; Karen Lafferty, Hockessin; Holly Raser, Kimberton; Cathy Wollaston, Toughkenamon; Ester King, Oxford.

Other county winners included: Becky Robinson, Clothing and Home Management, Daniel Weinstock, Conservation and Petroleum Power; Zachary Iseminger, Malvern, Health and Conservation; Marjorie Pyle, Malvern, Consumer Education and Food-Nutrition.

Joan Liesau, Spring City, Sheep and Conservation, Cheryl Yoder, Spring City, Photography and Dog Care; Douglas Warren, Chester Springs, Poultry and Agriculture; Pam Taws, Paoli, Horse and Health, W. Hosea Latshaw, Agriculture and Public Speaking; Robert Minshall, Avondale, Photography and Safety; Patti Yarnall, Oxford, Horse; Dot Minshall, Avondale, Public Speaking and Food-Nutrition; Karen Lafferty, Hockessin, Clothing, and Jennifer Riggs, Paoli, Public Speaking.

Becky Robinson (right), West Grove, received the trophy for being Chester County Outstanding 4-H Girl from Mrs. Carol Rothermel, assistant Chester County Extension Home Economist. The award was presented recently at the county 4-H Achievement Banquet.

Keystone Awards, recognizing top 4-H'ers in the state for outstanding 4-H project achievements were presented to W. Hosea Latshaw, Agriculture, Daniel Weinstock, Conservation; Douglas Warren, Poultry; and Robert Minshall, Photography.

Mrs. Carol Rothermel, assistant Chester County Extension Home Economist presented the Bucktown Stitch and Snack 4-H Club their club charter. Colleen Painter, club president, and Mrs. Jesse Painter, 4-H Adult Leader, accepted the charter for the club.

Honored for years of service as adult leaders were: Harold F. Pyle, Malvern, 25 years, Mrs Charles C Brosius, West Grove, 15 years, Mrs Ray Cross and Mrs Stockton Welsh, Rockville, Mrs Ernest Salzer, Pottstown and Clyde Scheib, Phoenixville, 10 years, Joel Brown, Oxford, Lester High, Pottstown, Mr. and Mrs Eugene Liesau, Spring City, Lloyd Mast, Elverson, Mrs William Moore Chatham, Robert Pepple, Oxford, Nelson Stoltzfus, Parkesburg, and Mrs Chester Warren, Chester Springs, five years

The 4-H Achievement Banquet was planned and sponsored by the Chester County 4-H Council

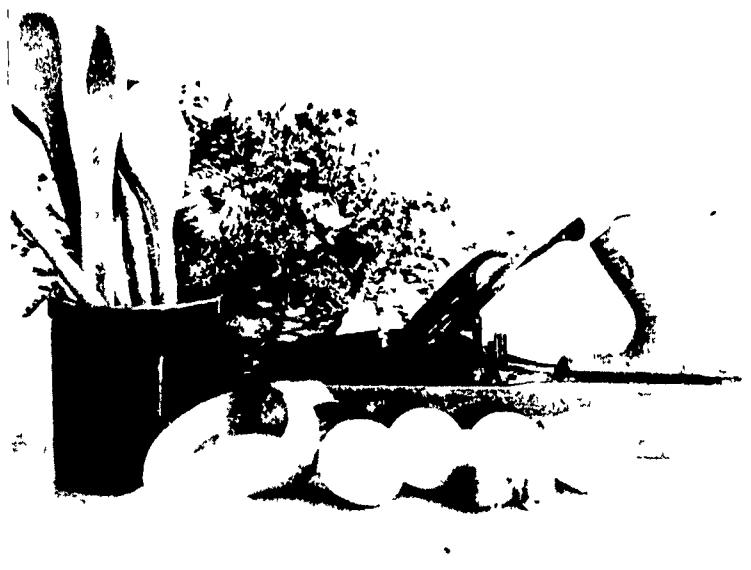
Homestead Notes

Pat Erway, Editor



Mrs. Doris Thomas . . .

Administrator of a Variety of Programs

"Dear Abby for Homemakers" might be a good title for Doris Thomas, Lancaster County's extension home economist. Like the famed columnist, Doris spends a lot of time answering questions. Some are simple - "How do you bake a potato?" Some are a little tougher - "How do I alter a size 12 dress pattern to fit a body that's size 11 some places and size 13 others?"

After ten years on the job, you'd think she had heard just about every question anybody could possibly ask about homemaking. But whether she's at her office in Lancaster's Farm and Home Center, or working someplace else, Doris says she still gets plenty of surprises.

Doris discusses the Expanded Nutrition Education program with nutrition assistant Linda Lueck and supervising aide Tillie Gibson.

Reflecting on some of the changes that have taken place over the years, Doris says the one that's affected her most of all has been her change from teacher to administrator. The number of programs she's involved with have grown both in scope and in number. It is her responsibility to see that each program functions smoothly, and that each serves a useful purpose.

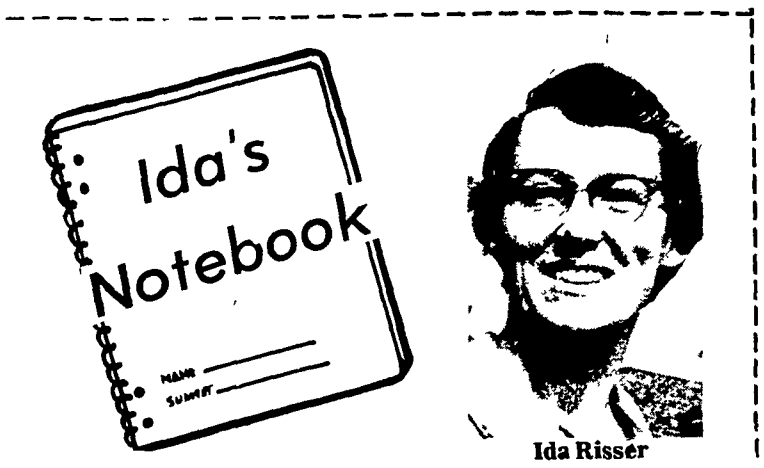
"One reason my job has changed," Doris pointed out, "is that the homemakers have changed. They're a lot busier today than they used to be. Years ago we could reach everybody by holding meetings. Now we have to find other ways to communicate."

"To meet the needs of young mothers and the increasing number of working mothers, a 'Dear Mother' and 'Dear Parent' letter were added to the original newsletter. To keep current, new topics vary from money management to drug information," Doris said.

Interest in sewing courses has jumped tremendously, and Doris attributes this to the "great sewing revival which began in the late Sixties." At that time, she says, "Women began sewing not only to save money, but to get the quality in their clothing which was lacking in ready-to-wear garments, and to provide themselves with a creative outlet." She said home-sewing interest is growing primarily

(Continued On Page 25)

Using the sewing machine, Doris demonstrates a fine point of tailoring.



Ida Risser

Recipe Exchange . . .

Home on the Range

This week the recipes dwell mainly with recipes we received recently using end-of-the-season harvest items, mainly pumpkins. We like to keep our recipes current so you can use what you have on hand.

We are beginning to receive some yummy-sounding holiday recipes, mainly candy and cookies. We hope you will send us lots more, too! Looks like it is time to shed a few pounds, for we'll sure add some over the oncoming holiday season. In fact, many of these recipes sound so tempting that they almost add a few ounces just reading them!

We have several recipe requests from Mrs. Ruth Emerson, Cochranville RD2. She would like to have a recipe for Sweet Potato Pie, a Pizza Sauce recipe, and holiday cookie recipes. Will some you come to her aid? Send your recipe, or several perhaps, to: Recipes, Lancaster Farming, Box 266, Lititz, Pa. 17543. Your handy potholder will be in the mail to you in a few days.

Pumpkin Pie

2 cups boiled pumpkin
3 eggs
2 tablespoons molasses
1 tablespoon melted butter
1 teaspoon cinnamon
1 pinch salt
2 cups sweet milk
2 cups sugar

Mrs. Elizabeth Martin
R.D 1
New Holland

xxx

Pumpkin Cookies

1 cup lard
2 cups pumpkin (cooked)
2 cups brown sugar
Sift together:
4 cups flour
2 teaspoon baking soda
2 teaspoon baking powder
2 teaspoons cinnamon

Add nuts or raisins. Ice maple frosting while still warm.

Maple Frosting

¼ cup crisco
1 pound 10X sugar
½ teaspoon maple flavoring
2 tablespoons milk

Mrs. Jonathan G. Lapp
R.D.2
Narvon

xxx

Sweet Potato Pudding

2 cups mashed sweet potatoes
2 eggs
1 cup top milk
6 tablespoons sugar
1 teaspoon salt
2 tablespoons butter
Marshmallows or marshmallow whip

Cook sweet potatoes with skins on until soft. Peel and mash.

Add sugar, salt, melted butter and top milk. Beat eggs well and add to mixture. Pour in buttered

(Continued On Page 24)

It seems as though we are gradually getting ready for Winter. The windowsills are full of potted flowers and plants which will take time to water and tend in the weeks to come. Apples and tea have been dried for later use.

The shellbarks and black walnuts are gathered and spread on screens to dry near the furnace. Even the first mice to venture into the house have been trapped and fed to the cat. Now all I need to dispose of is the spiders in the corner.

XXXXXX

Recently I went into a natural food store to buy rye flour to make bread and was simply amazed at the wide, wide variety of beverages available. There were row on row of dried leaves, seeds, roots and barks to be used for tea.

Here is a partial list of available items: watermelon seed, flax seed and fennel seed. The following roots were listed: licorice root, chicory root and dandelion root. There were separate boxes of these weeds: horsetail, nettle, chickweed, boneset and coltsfoot. Some of these leaves surprised me: raspberry, strawberry, blueberry, parsley, dandelion and catnip.

Convenient tea bags contained shave grass, papaya, alfalfa, rose hips, and sassafras. You could use cornsilk, wild cherry bark, hawthorn and juniper berries, elder flowers or sarsaparilla for your beverage.

So if you get tired of serving coffee there are other hot drinks available.

XXXXXX

My college age son tells me his friends were astounded by his ingenuity last year at school.

When a corn popper or watch was broken he repaired it. When a ten-speed bike lay in parts (after a paint job) he told the owner how to put it all together -- even though he's never had one.

When the fellows wanted maple syrup for their pancakes he cooked a batch for them. They would ask what he needed and then snitch sugar from the cafeteria tables. Some of them never heard of making your own syrup.

Maybe he is just a jack-of-all-trades.

baking dish and top with marshmallows.

Bake at 350 degrees for 45 minutes.

Mrs. Elmer Wenger
Route 2
Manheim

xxx

Spicy Pumpkin Cake

½ cup (1 stick) butter
1 cup sugar
2 eggs
2 cups all-purpose flour
1 teaspoon baking powder
½ teaspoon soda
1 teaspoon cinnamon
½ teaspoon salt
⅛ teaspoon cloves
1 cup cooked pumpkin
½ cup milk
½ cup chopped nuts

Cream butter and sugar and beat until fluffy. Beat in eggs, one at a time. Sift flour and other dry ingredients. Add to creamed mixture alternately with pumpkin and milk. Stir in nuts. Turn in buttered 9x5x3 inch loaf pan. Bake at 350 degrees for 60 to 70 minutes. Cool in pan for 10 minutes. Turn out and cool completely.

Mrs. W. H. Fox
R.D.1
Denver

xxx

Pumpkin Chiffon Pie

For 9-inch pie, blend thoroughly in saucepan:

1 envelope unflavored gelatin (1 tablespoon)
2-3 cup brown sugar, packed
½ teaspoon salt
½ teaspoon cinnamon
½ teaspoon nutmeg
½ teaspoon ginger
1¼ cups mashed, cooked pumpkin
3 eggs yolks
½ cup milk

Cook over medium heat, stirring constantly, until it boils. Remove from heat. Place pan in cold water. Cool until mixture mounds slightly when dropped from a spoon.

Carefully fold into a meringue of:

3 egg whites
½ cup sugar

Pour into baked pie crust. Chill until set, about 2 hours. Garnish with whipped cream.

Elva L. Fox
R.D.1
New Holland

xxx

Homemade Sauerkraut

Shred cabbage into crock. Sprinkle salt over cabbage every so often. Press cabbage down till juice comes up over it. Use approximately ½ cup of salt to a dishpan full of shredded cabbage. Cover with a plate and weight down. It's best if the juice can drain off. Set in cellar for 10 to 14 days. Remove spoiled top. Wash kraut and pack in cans. Cold pack boil 30 minutes.

Emma Beiler
2198 Habson Road
Lancaster

xxx

Fresh Tomato and Rice Salad

1 1-3 cups (5 oz. package) packaged precooked rice
½ teaspoon salt
1½ cups boiling water
3 fresh, ripe tomatoes, peeled and diced
Salt
¼ cup mayonnaise
1½ tablespoons catsup
1-3 to ½ cup sliced scallions
Dash of pepper

Add precooked rice and ½ teaspoon salt to boiling water in saucepan. Mix just to moisten all rice. Cover and remove from heat. Let stand 13 minutes, then uncover and cool to room temperature.

About one hour before serving, sprinkle tomatoes lightly with salt and let stand about five minutes. Combine mayonnaise mixture and mix lightly. Then add the rice and mix lightly with a fork. Chill.

Serve on crisp lettuce. Garnish with additional tomatoes and with hard-cooked eggs. Makes about six servings.

Lucy Martin
R.D.2
Ephrata

xxx

Apple Salad

1 egg
1 tablespoon flour
½ cup water
½ cup sugar
1 tablespoon butter
1 tablespoon vinegar
Pinch salt

Bring to a boil. When cool pour over apples; bananas, raisins, celery and nuts may be added, also miniature marshmallows if desired.

Marian Stoltzfus
211 Pequea Lane
Lancaster

xxx

Tomato Soup

Cut up about six nice-sized tomatoes after they are peeled and seeded and put in a pot and cook till soft (just a short time). Add ¼ teaspoon soda and milk next so the milk doesn't curdle. Add salt and pepper to taste and butter and heat but do not let boil.

Variety of Programs

(Continued From Page 22)

among middle and upper income families.

Because the clothing construction courses generated so much enthusiasm, Doris found that she and the assistant home economist could no longer teach the courses themselves and accomplish their other duties as well. In January of 1969, the first outside teachers were hired to meet demand, and today two extension assistants carry the major teaching responsibility. Doris says that in a single year as many as 1,200 women have enrolled in these courses.

According to Doris, most popular now is the cut-to-fit course, designed to help women adjustpatternsto their particular figure problems. Doris adds. "The newest courses which have attracted great interest are sewing with knits, and the menswear course."

"The foods and home decorating courses are always popular with Lancaster County homemakers." Drapery making and upholstering draw big groups too.

Doris classifies her sewing interest as her hobby, but it wasn't always so. When she was first inspired to go into home economics by a Quarryville junior high school teacher, she wanted to become a hospital dietician.

Although she never worked in a hospital, upon graduation from Hood College in Frederick, Md., she worked as a dietician in food management service for Slater Foods in Philadelphia. After completing their training program she acted as a trouble-shooter for the company which provided food for hospitals, industry and schools in the area.

Returning to her native Lancaster County, she worked for two years as a home demonstration agent for (UGI Corporation), starting their home service division in Lancaster. In this position she handled complaints, provided for groups and worked with individual homemakers.

She then taught home economics at Solanco High School for six years, with a four year interruption to travel with her husband, Charles, in the Service.

One extension program which proved very time-consuming in its early phases is the Expanded Nutrition Education program, designed to meet the needs of low-income families. The program is now in its second year and Doris calls it "the most valuable program extension has been involved in." A nutrition assistant, a supervising aide and seven para-professional aides carry the program to the people.

It was difficult to get started, Doris says, because of the reluctance of existing agencies who work with the needy to refer families to the extension service. These agencies wanted the program to prove itself before they referred families for assistance.

Leader training and education is a favorite part of her work. Doris fits a muslin sample to Mrs. Mary Martin, one of the County 4-H leaders.

As evidence of the nutrition program's success, Doris speaks glowingly of the dedication of the aides, who "believe in the program and talk of how it has helped them and their families." She can cite concrete examples of its progress: One family has had their children returned to them after they had been removed by the Bureau of Children's Services; a family now has adequate housing through aides' efforts; the program has helped women get off public assistance, and has influenced women to go back to work. "Working on a one-to-one basis with the needy families has been most successful," Doris says.

She says there has been a great increase in the last three or four years in extension's involvement with other agencies which concern themselves with family living. Such agencies include State Health Department, Visiting Nurses Association, Department of Public Assistance, Bureau of Children's Services, Family and Children's Services, Community Action Program, County Council of Churches, Family Health Clinic at Lancaster General Hospital. Extension participation ranges from training agency personnel in some instances, to representation at meetings and referral.

"One of the most pressing challenges of the immediate future ," according to Doris, "is working to meet the need for adequate housing for the nation's largest minority, the elderly. In Lancaster County alone, 40,912 people out of the population of 320,000 are over 62."

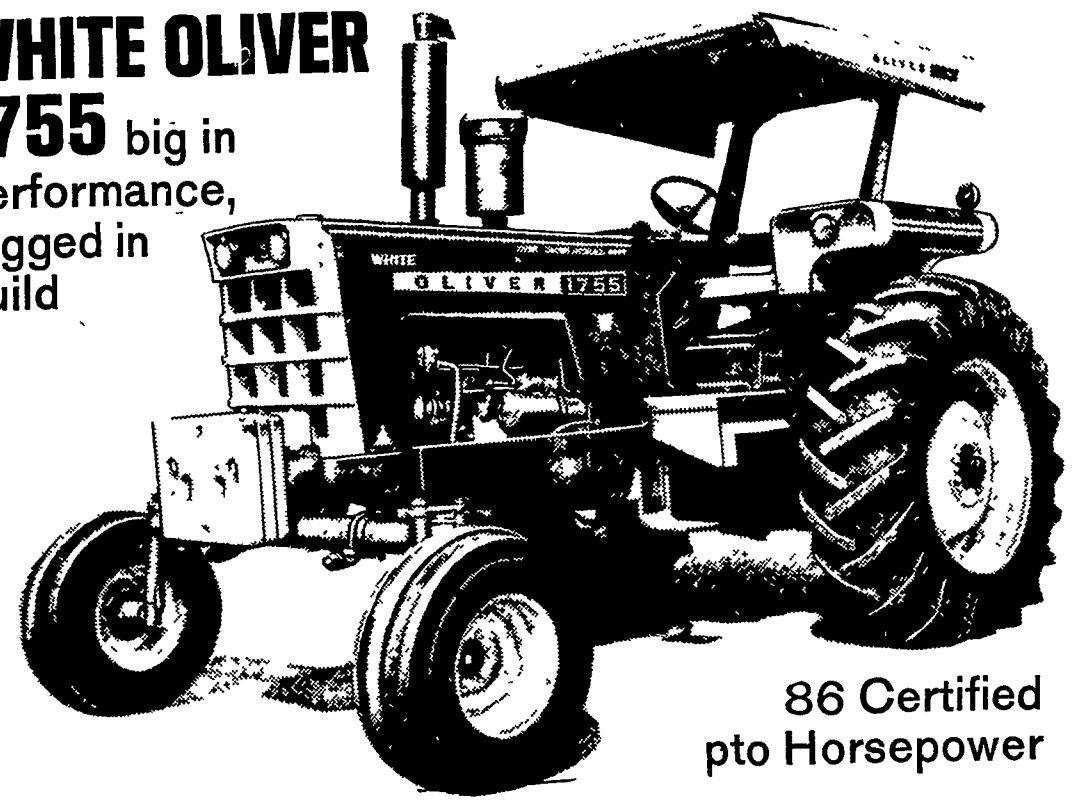
When asked about the rewards of her work, Doris quickly replies, "It is most exciting to see the results of the youth program and have young people select careers in home economics because of their 4-H involvement It is also gratifying to see the development of leadership ability in women." She adds that it is "frustrating to have to give up my teaching role for administration" because she enjoys working with people in developing their skills.

The Thomas household consists of her husband Charles, 16-year-old Debbie and her mother, Mrs. Ada Work. With her active career, there is little time for hobbies, but Doris cheerfully sews for the entire family, including her husband, who proundly wears the sports jackets and slacks she has sewn for him.

Professional memberships for Doris include the Pennsylvania and National Extension Home Economists Associations, the Lancaster County Home Economics Association.

The greatest challenge of the future for extension home economics, Doris says, is "to help families cope with changing life styles in a changing society."

WHITE OLIVER 1755 big in performance, rugged in build



86 Certified pto Horsepower

Need a tractor? Buy any tractor. Any Oliver. Any Minneapolis-Moline. And pay no interest until March 1, 1973. Or buy a tractor plus any implement. Purchase them on the same sales slip. And the interest-free offer goes for that buy, too. Remember, interest's free on any tractor plus baler, pull-type forage harvester, plow, disk, harrow, cultivator, planter, any implement during the big interest free-for-all.

Get at ½ price. Optional Hydraul-Shift with on-the-go underdrive and overdrive offers 3 speeds in each of 6 ranges-18 in all.

Plan Now for Colorful Gardens Next Summer

Just a few of the great variety of shrubs, vines and trees available can turn a monotonous green summer garden into a colorful one, a new publication by the U.S. Department of Agriculture (USDA) suggests.

Considering the small amount of care required, flowering shrubs, vines and trees can be just as rewarding as annuals or perennials, according to plant scientists of USDA's Agricultural Research Service who wrote the publication.

Thirty-one shrubs, from the decorative Kashmir False Spirea to the popular rose; five vines, including bittersweet and honeysuckle; and six ornamental flowering trees are listed by their common and scientific names.

Many of the shrubs, vines, and trees described in the illustrated publication can be planted in the fall. A zone map is included to aid gardeners in determining whether or not each plant is suitable for specific geographic areas.

Directions for planting shrubs, vines and trees are also given. The bulletin cautions that masonry walls are good for vines, while wooden walls are easily damaged by the weight of the vine and the moisture held in the foliage.

Copies of HG 181, "Shrubs, Vines, and Trees for Summer Color" are available for 15c each from the Superintendent of Documents, U.S. Government Printing Office, Washington, DIC. 20402. Use zipcodes.

How to fertilize if next Spring is another wet one.

It's easy. Do it all this Fall with unique Unipel 20-10-10

Last Spring practically set a record for late planting in many areas. And it could happen here next year, too. But with fall plowing plus Unipel 20-10-10 you can reduce the worry and costly delay.

Unipel 20-10-10 is the unique complete high-nitrogen fertilizer. Plow it down this Fall and give plants a faster stronger start next Spring. It is even formulated for steady nutrient release, so plants have a continuous source of NPK available throughout the growing season.

You can do it all in the Fall. We'll be around soon with the whole story.

Farm Women Societies

Society 18

Farm Women Society 18 members met Saturday, October 21 for their annual banquet at the Akron Restaurant. Husbands were honored guests.

Arrangements for the event were made by the program committee, Mrs. I. Wayne Brubaker, chairman and the social committee, Mrs. Harold D. Kimmel, chairman.

The program featured chalk artist Rev. E. C. Mehle, pastor of Salem United Church of Christ.

Attention was called to the change of date for the November meeting which will be November 11 at the home of Mrs. Kenneth S. Brubaker.

Society 19

Farm Women Society 19 donated $20 to the United campaign at its recent meeting held at the Lititz Church of the Brethren. The Society entertained members of Society 2.

The program, entitled "Backyard Craftland", was presented by Mrs. George Dell whose family operates "Open House Christian Gifts", Lancaster.

Devotions were in charge of Mrs. Richard Nolt. Special music was provided by Mrs. David Wenger, Mrs. Donald Horning and Mrs. Roy Burkholder.

Mrs. Kenneth Warfel, president, announced plans for a display table at the annual Christmas Homemaker's Program at the Farm and Home Center, November 28. The group was reminded of the Convention November 4 at the Lancaster School of the Bible.

The next meeting will be held at the Akron Restaurant November 11 at 6:30 p.m. when the group will entertain their husbands.

Now a Park

The original farm of Thomas Lincoln, three miles from Hodgenville, Ky., is now the Abraham Lincoln National Park. A memorial encloses the log cabin reputedly Lincoln's birthplace.

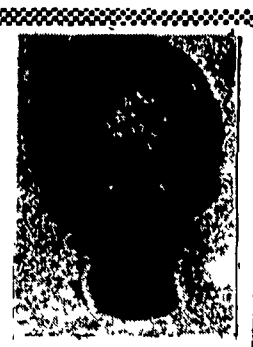
Ladies, Have You Heard?



Doris Thomas

By Doris Thomas,
Extension Home Economist

FALL FOR APPLES

Sir Isaac Newton was inspired to work out his law of gravity after observing an apple fall. Probably the apple was bruised in the fall: apples need to be handled carefully.

The U. S. Department of Agriculture has some tips on how to handle those apples with care. Apples should be kept in the refrigerator to keep them at their flavorsome best. Dry air absorbs moisture and induces shriveling, so keep apples in the crisper drawer. And remember - one bad apple can spoil the whole barrel. Check your apple supply periodically, and separate those to be used immediately from those which will keep longer.

The USDA also has another tip: apples are abundant now. Don't wait to enjoy all those delightful, mouth-watering apple dishes Create an apple fantasy today.

Apples may be served baked for breakfast, sliced in salads, fried for fritters. Of course, there are also apple spice breads, apple muffins, apple relishes and preserves, fried apple rings; the list could stretch on and on

Apples also possess moisture-restoring properties. For example, a slice of apple may be used to loosen hard, lumpy brown sugar Brown sugar cakes, when it is dried out Here is how to restore it to health. Place the sugar is a tight container (a large glass jar with a screw top or a metal canister), and include a slice of apple on a piece of waxed paper. After a few days the sugar will have absorbed enough moisture from the apple to be loose again.

Now that you have brown sugar and apples, why not use them to make a delicious APPLE PAN-DOWDY:

6 tart apples
4 tablespoons brown sugar
¼ teaspoon nutmeg
¼ teaspoon cinnamon
¼ cup molasses or ¼ cup granulated sugar & ¼ cup honey
dash of salt

TO PREPARE: Slice the apples into a buttered casserole dish. Put everything else on top. Mix well and dot with butter. Bake at 375 until the apples are tender. While the apples are baking, prepare a rich biscuit dough. Cover the top of the apples with it, and bake 15 minutes longer in a 400 degree oven until biscuit topping is done. Yields 6 servings.

PASTA IS A "NATURAL FOOD"

Today's trend is to be natural. The "in" thing is to look, act and be natural. Going along with this idea is the ever-increasing interest in natural foods.

From Maine to California, Americans are turning to the old-fashioned goodness of foods prepared simply and nutritiously with basic ingredients. For most people natural foods are those that are as unprocessed and unrefined as possible, with few or no chemical additives. Surprisingly, these include many items in your supermarket such as wheat germ, sesame seed, whole grain breads and flour, dried peas and beans, yogurt and honey. You can also find other exotic natural foods in special markets or natural food shops. You will pay more for these ingredients.

One of the common "naturally good" food products that everyone likes is pasta. The name pasta includes the wide variety of macaroni, spaghetti and egg noodles available. Pasta's basic ingredients make it a natural product. Unbleached flour from a special hard durum wheat is mixed with water to make the varied shapes and sizes of macaroni and spaghetti. Noodles have the bonus of eggs added to the dough.

Pasta products are included in the bread and cereals group of the Basic Four food groups. So pasta not only tastes good, can be served in a variety of ways, but provides you with a natural, inexpensive food.

SPECIAL SALE
185 - HOLSTEINS - 185
Garnett Payne Herd
NOV. 2, 1972
11 a.m.
AT
The Melvin Kolb Farm, Woodsboro, Md.

Located ½ mile Northwest of Woodsboro, on Route 550, Frederick County

This herd consists of 90 Cows Fresh within the last 90 days; 50 due through until December; the remainder will be in different stages of lactation. 20 First-calf Heifers due this Fall. This is a Summer and Fall herd of cows, home raised; cows are large in size, mostly good udders, good dairy type; most are young. If HFAA papers had been updated, most of these Cows could have been Registered. Either Artificial or PB bull used at all times. Mr. Payne has culled this herd systematically during the last year. This is an above-average herd of cattle which will be producing a large volume of milk. All cattle will be tested for TB and Bangs and checked for pregnancy, eligible for interstate shipment.

Farmers in need of good dairy cows: Don't miss this Sale!

Urner

(Continued From Page 1)

Marketing Association at Ephrata's Holiday Inn.

Frank Urner is a partner in Urner-Barry Publications, publishers of Producers, Price Current. This publication lists daily prices of a wide range of agricultural products, including eggs. The procedure for collecting the information on which to base a daily price involves calling a varying number of people who know what the market is doing in their areas.

"Market reporting is almost as much an art as it is a science," Urner told the group. "When one guy tells me things are great, I know they're mediocre. When another guy says business is average, I know he's probably moving eggs out as fast he can. I can't just deal in numbers, I have to work with people, too."

One of Urner's main objections to the ECI committee approach was that all the committee members were to be part-time market experts. He contended that egg prices could not be determined dependably by a few people who spent a couple of hours on the phone two days a week.

Urner Barry also was not convinced of the legal status of a price reporting committee, and this figured in Urner's decision to pull out.

Perhaps one of the most serious objections Urner's company had to the ECI committee was the method of reporting, and how it would affect Urner Barry profits. On this point, he was very explicit. Near the end of his talk he said: "Up to this point, I have dealt only with procedures in price discovery. There is for Urner Barry, however, a practical problem of getting income to pay our expenses in gathering marketing data and thereby being able to keep ourselves a viable business operation.

"In our discussions with ECI, there was to be no net compensation to us for our participation. Consequently, we would remain dependent on the sale of subscriptions to the Producers' Price-Current, and income from our other reporting services to pay our costs in gathering market data. To protect us from loss of this income Urner Barry would receive exclusive use of the committee quotations.

"We were very surprised, therefore, to find that the price committee quotations of September 7, had been released to one of our competitors approximately 2½ hours after our initial release and some of our customers had been told that they could receive all the information that was being received from us directly from ECI and without charge. Whether this was deliberate or through misunderstanding we do not know. We do feel, however, that it does not take a very analytical mind to understand the ramifications of such a policy."

AGWAY

IMPROVE HAY QUALITY BY TOP-DRESSING AGWAY LPS

A considerable amount of low quality hay was produced this summer as a result of weather conditions. The nutritive value and palatability of hay can be improved with the addition of Agway LPS (Liquid Protein Supplement) as a top dressing, and the improved value is easily justified in dollars and cents.

NUTRITIONAL ADVANTAGES

The addition of 1 pound of LPS containing .33 pounds of crude protein to 4 lbs. of hay (8 percent crude protein) containing .32 pounds of crude protein gives a total of .66 pounds of crude portein. This makes a hay with 13 percent protein instead of the beginning 8 percent protein hay.

Energy level has not changed much but the palatability has been improved. Thus induces cows to eat more, an important factor in milk production.

Low quality hay is often lacking in minerals, especially phosphorus. One and a half pounds of phosphorus is added to hay with every 100 pounds of LPS. (It would cost 60 cents to supply this much phosphorus with tripolyphosphate.)

Two to three pounds of LPS per day will provide half of the daily vitamin requirement for dairy animals.

GOOD ECONOMICS, TOO:

Four tons of low quality hay at $40.00 per ton equals $160.00. Add a ton of LPS at $80.00. This makes 5 tons of much improved hay at a cost of $240.00 or $48.00 per ton. How much hay with 13 percent digestible protein can you buy for $48.00?
